

## How to use the service

### What is this service?

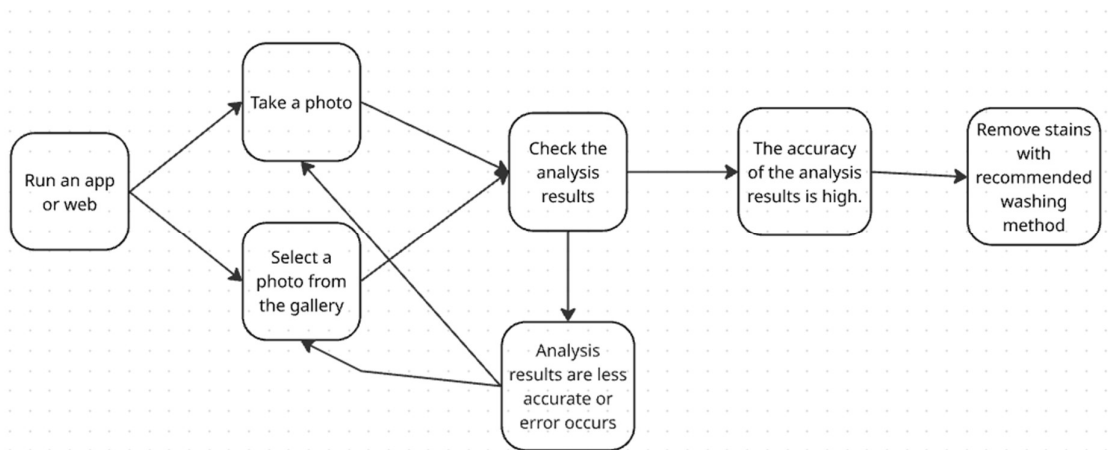

This service allows users to upload or take a photo of a fabric stain and receive an analysis result through a mobile application or webpage. Based on the analysis results, cleaning methods are recommended to help remove stains.

### Usage Environment (deploy)

You can enter the URL into the Internet browser or take a QR code to access the web page.

You can install the Thunkable Live App and access it through a link or attach a link to the Internet to use the app.

### How to Use

### User Tips

- Filming in a bright light.
- Filming the stain is in the center of the screen.
- Don't take pictures too far away.
